Legend

Helium: Between 1961 and 1976 cumulative production of Helium was 9,237,801 MCF.

Gas Disposition Symbols in this Report:

V - Flared/Vented S - Sold State Permit numbers are shown in parentheses.

U - Used on Lease L - Lost (MCF estimated) * - Amended Report

E - Explanation - The gross gas stream produced from these wells is measured at the wellsite.

Then the gas is received by a gathering system with field compression to be delivered by pipeline to a helium extraction plant located in the area. The gas produced is over 90% inert components of which helium is recovered at the plant. The natural gas portion of the produced gas is less than 1% and is not commercialized. The helium content of the wells in the fields range between 5-8% and it is the only component of the produced gas that is commercialized downstream.

All production done in Apache County.

Numbers may not total due to rounding.
